CREATING AN SSH CONNECTION WITH THE RASPBERRY PI

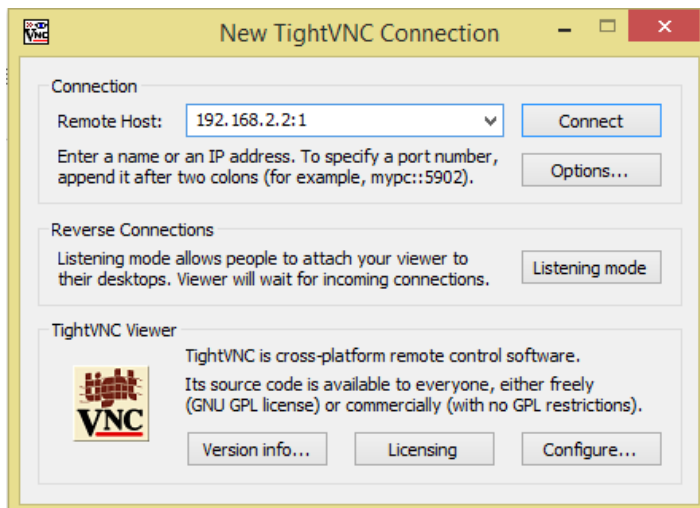

1. Install TeraTerm
2. Click File --> New connection,
3. Select TCI/IP Connection
4. Then type in your Raspberry Pi's IP

5. Click OK with the default settings
6. Click Continue for the Security Key Question
7. Enter the Username as **pi**
8. Enter the Password as **raspberrypi**
9. Click OK to login in to the Raspberry Pi SHELL

CREATING A VNC CONNECTION WITH THE RASPBERRY PI

1. Install TightVNC viewer in your system

2. Open your TightVNC Viewer
3. Type in the IP of your raspberry Pi followed by the Display Number
4. The default display Number is 1
5. Click Connect with the Default settings
6. When asked for password enter the default password "**password**"
7. It would open a VNC connection with the raspberry Pi

8. The Raspberry Pi is installed with Raspbian OS and the default desktop environment is PIXEL
